

TUNDRA TESTING

CAPABILITY STATEMENT

Soil • Water • Air • Solid Waste

BUILT FOR THIS LAND

Keeping environmental testing closer to the projects, communities, and decisions it supports.

LABORATORY & SCIENTIFIC SERVICES

We provide laboratory analysis for soil, solid waste, water, and air using EPA-published and EPA-referenced methods. Beyond laboratory testing, we provide scientific consulting and analytical services tailored to your project objectives and applicable regulatory requirements. Whether you're managing site characterization, environmental monitoring, remediation, or regulatory reporting, our team provides local technical and analytical services throughout your project.

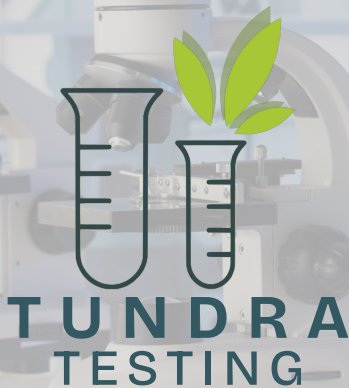

WHO WE ARE

Tundra Testing is a veteran-led, Alaskan-owned laboratory based in Anchorage. Strategically located near Ted Stevens Anchorage International Airport, we help keep laboratory services close to Alaska's projects, supporting efficient sample logistics and delivering scientifically defensible data backed by documented quality systems and analytical integrity.

DIFFERENTIATORS

- **Local Access:** Anchorage-based operations help reduce logistical complexity by keeping laboratory services closer to Alaska's projects.
- **Scientific Support:** Environmental testing, chemical analysis, and scientific consulting to support project-specific objectives.
- **Veteran-Led:** A foundation built on service, accountability, and mission-focused execution.
- **Digital Accountability:** Tundra Testing employs Thermo Fisher™ LIMS technology to provide sample traceability, automated workflow notifications, and secure client access for transparent data management.
